

Geography Vision Statement

The study of geography is about more than just memorizing places on a map. It is about understanding the complexity of the world. President Barack Obama

At Capel St Mary our vision is to sow the seeds of global curiosity through our exciting curriculum. Our aim is that children, through investigation, exploration and hands on experience will have the confidence to take their first steps to becoming caretakers of the world around them.

Children will study and understand the importance of the physical features and phenomena of our natural world. They will also gain a sense of belonging through the traditional study of location.

It is also important that children are aware of the rich diversity of cultures both locally and worldwide. This will prepare them for their role as global citizens in a world without boundaries.

These ideas link together to ensure that our children have an understanding of their impact on the environment and the sustainability of our planet.
